Crash Course: AWS Basics

Md Nasimul Hasan

I'm passionate about simplifying complex systems into intuitive, maintainable architectures that developers love working with.

Rangpur, Rajshahi, Bangladesh

Summary

I build distributed backends and full stack features that prioritize reliability, performance, and cost. Experience spans real time collaboration, search and ranking, job orchestration, notifications, and rate limiting, built with clarity, safety, and growth in mind.

* Experience:*

- 12 years of overall experience, including skills in frontend development, backend deployment, and mobile app development..
- Proficient in JavaScript and has considerable expertise with Node.js, React, Next.js, Redux, Express, and Socket.io.
- Experienced in Android app development using Java and Kotlin, as well as Python web automation with Selenium and Requests.
- Familiarity with PyQT and OpenCV for various projects.
- Currently employed as a Junior Software Engineer, responsible for frontend development, backend deployment, and contributing to React Native projects.

Skills:

- Proficient in JavaScript and modern frontend frameworks such as React, Next.js, and Redux.
- Experienced in backend development with Node.js and deployment with Express.
- Skilled in Android app development with Java and Kotlin.
- Proficient in Python for web automation and projects involving PyQT and OpenCV.

* Career Highlights:*

- Led successful development projects, delivering high-quality frontend solutions.
- Contributed to the deployment of robust backend systems, ensuring smooth operation.
- Actively involved in React Native projects, driving innovation and efficiency.

- Pursuing continuous professional development, with plans to master low-level programming in Rust and delve into Data Science and Machine Learning in 2024.

Experience
